### Company car drivers

Our CO<sub>2</sub> improvements across the Mazda range result in significant savings in BIK costs for company car drivers, with some versions of Mazda6 dropping four BIK bands versus the previous model.

### Calculating your BIK tax costs

Benefit-in-kind costs depend on two factors - the P11D value of your vehicle and the level of CO<sub>2</sub> the vehicle emits. CO<sub>2</sub> levels determine the % of P11D value that is used as the 'taxable value' allocated against your company car. The Mazda6, for example, offers high levels of refinement and specification value combined with low levels of CO<sub>2</sub> emissions.

### Example

**Mazda6 2.2 5dr TS<sup>2</sup> Diesel P11D price £19,330 (Total Retail Price)**

**CO<sub>2</sub> emissions 147g/km**

**Equates to a taxable value 20% of P11D i.e. £3,866**

**BIK tax @ 40% = £1,546.40 per year**

Use the table below to determine your BIK (remember your tax band - either 20% or 40%) for any of the Mazda range. CO<sub>2</sub> levels are stated for all passenger car models within this price list.
